

# Implementation of School-Based Assessment

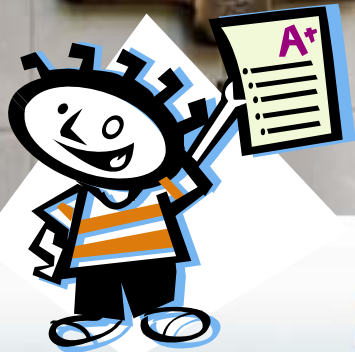

- Some skills (e.g. data collection, implementation of a plan) cannot be effectively assessed in pen and paper examination
- Enhance the completeness of public assessment and assess students' abilities in different facets
- SBA will firstly be commenced in 8 subjects and 4 science subjects (laboratory work only) in 2012 and progressively be implemented in other subjects
- Full implementation in all subjects will be in 2016
